INTRODUCTION

Overview

Capital One Financial Corporation, a Delaware corporation established in 1994 and headquartered in McLean, Virginia, is a diversified financial services holding company with banking and non-banking subsidiaries. Capital One Financial Corporation and its subsidiaries (the “Company” or “Capital One”) operate as a global payments provider and diversified financial institution, delivering a broad array of financial products and services to consumers, small businesses and commercial clients through digital channels, branch locations, cafés and other distribution channels.

As of March 31, 2026, Capital One Financial Corporation’s principal operating subsidiary was Capital One, National Association (“CONA” or the “Bank”). On May 18, 2025 (the “Closing Date”), Discover Financial Services (“Discover”) merged into Capital One and Discover Bank merged into CONA. See “Part II—Item 8. Financial Statements and Supplementary Data—Note 2—Business Combinations and Discontinued Operations” in our Annual Report on the Form 10-K for the year ended December 31, 2025 (the “2025 Form 10-K”) for additional information. The Company is hereafter collectively referred to as “we,” “us” or “our.”

Regulatory Framework

The Company and the Bank are subject to the Liquidity Coverage Ratio (“LCR”) standard as implemented by the Board of Governors of the Federal Reserve System (“Federal Reserve”), the Office of the Comptroller of the Currency (“OCC”) and the Federal Deposit Insurance Corporation (“FDIC”) (collectively, the “Federal Banking Agencies”) in the United States, respectively (“LCR Rule”). The LCR Rule requires both the Company and the Bank to hold an amount of eligible high-quality liquid assets (“HQLA”) that equals or exceeds 100% of its respective projected adjusted net cash outflows over a 30-day period, each as calculated in accordance with the LCR Rule:

$$\frac{\text{High-Quality Liquid Assets}}{\text{Total Net Cash Flow}} \geq 100\%$$

The LCR Rule requires quarterly public disclosure of quantitative information about a covered institution’s LCR calculation and a qualitative discussion of its LCR. The Company and the Bank are required to calculate their respective LCR on a daily basis. Additionally, the Company is required to disclose the quarterly average of its LCR. For the three months ended March 31, 2026, the Company and the Bank exceeded the LCR requirement.

As a bank holding company with total consolidated assets of at least \$250 billion but less than \$700 billion and not exceeding any of the applicable risk-based thresholds, the Company is a Category III institution for purposes of the LCR Rule. As such, the Company’s and the Bank’s total net cash outflows are multiplied by an outflow adjustment percentage of 85%. Although the Bank may hold more HQLA than it needs to meet its LCR requirements, the LCR Rule restricts the amount of such excess HQLA held at the Bank (referred to as “Trapped Liquidity”) that can be included in the Company’s HQLA amount. Because we typically manage the Bank’s LCR to levels well above 100%, the result is additional Trapped Liquidity as the Bank’s net cash outflows are reduced by the outflow adjustment percentage of 85%.

For additional information about the liquidity guidelines we are subject to, see “Part I—Item 1. Business—Supervision and Regulation” in our 2025 Form 10-K and “Part I—Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”)—Liquidity Risk Profile” in our Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2026 (the “Q1 2026 Form 10-Q”).

Basis of Preparation

This report contains our LCR Disclosures for the quarterly period ended March 31, 2026, and has been prepared in accordance with regulatory guidance prescribed by the LCR Rule. It should be read in conjunction with our Q1 2026 Form 10-Q and 2025 Form 10-K.

Forward-Looking Statements

Certain statements in this disclosure are forward-looking statements, which involve a number of risks and uncertainties. Forward-looking statements often use words such as “will,” “anticipate,” “target,” “expect,” “think,” “estimate,” “intend,” “plan,” “goal,” “believe,” “forecast,” “outlook” or other words of similar meaning. We caution readers that any forward-looking information is not a guarantee of future performance and that actual results could differ materially from those contained in the forward-looking information due to a number of factors, including those listed from time to time in reports that we file with the Securities and Exchange Commission (“SEC”), including, but not limited to the Q1 2026 Form 10-Q and 2025 Form 10-K. Any forward-looking statements made by us or on our behalf speak only as of the date they are made or as of the date indicated, and we do not undertake any obligation to update forward-looking statements as a result of new information, future events or otherwise.

Liquidity Risk Management

Our risk appetite defines the Board of Directors’ tolerance for certain risk outcomes at an enterprise level and enables senior management to manage and report within these boundaries. The Board of Directors approves a Risk Appetite Statement for the enterprise to set forth the high-level principles that govern risk taking at the Company.

Liquidity risk is the potential that we will not be able to meet our future financial obligations as they come due or invest in future asset growth because of an inability to obtain funds at a reasonable price within a reasonable time.

We manage liquidity risk by applying our Liquidity Adequacy Framework (the “Liquidity Framework”). The Liquidity Framework uses internal and regulatory stress testing and the evaluation of other balance sheet metrics to confirm that we maintain a fortified balance sheet that is resilient to uncertainties that may arise as a consequence of systemic, idiosyncratic, or combined liquidity events.

We recognize that liquidity risk is embedded within our day-to-day and strategic decisions. Liquidity is essential for banks to meet customer withdrawals, account for balance sheet changes, and provide funding for growth. We manage deposit gathering businesses and actively monitor our funding concentration. We manage our liquidity risk, which is driven by both internal and external factors, centrally and establish quantitative risk limits to continually assess our liquidity adequacy.

The Chief Credit and Financial Risk Officer, in conjunction with the Head of Liquidity, Market and Capital Risk Oversight, is responsible for the establishment of liquidity risk management policies and standards for governance and monitoring of liquidity risk at a corporate level. We assess liquidity strength by evaluating several different balance sheet metrics under severe stress scenarios to ensure we can withstand significant funding degradation. Results are reported to the Asset Liability Committee monthly and to the Risk Committee no less than quarterly. We also continuously monitor market and economic conditions to evaluate emerging stress conditions and to develop appropriate action plans in accordance with our Contingency Funding Plan (“CFP”) and our Recovery Plan.

We manage our funding and liquidity risk in an integrated manner in support of the current and future cash flow needs of our business. We maintain a stockpile of liquidity reserves including cash and cash equivalents, investment securities and Federal Home Loan Bank (“FHLB”) borrowing capacity secured by loans. Our funding sources include deposits, senior and subordinated notes, securitized debt obligations, federal funds purchased, securities loaned or sold under agreements to repurchase and FHLB advances secured by certain portions of our loan and securities portfolios. Insured deposits in our Consumer Banking business represent our primary funding source, as they are a relatively stable and a low cost source of funding.

For additional information on our risk framework and structure and organization of the Liquidity Risk Management function, see “Part I—Item 2. MD&A—Risk Management” in our Q1 2026 Form 10-Q and “Part II—Item 7. MD&A—Risk Management” in our 2025 Form 10-K.

Liquidity Coverage Ratio

The LCR Rule requires the Company to hold an HQLA Amount that equals or exceeds 100% of our projected net cash outflows over a 30 calendar-day stress period.

Table 1 provides a summary of our average weighted daily LCR for the quarterly period ended March 31, 2026.

Table 1: Liquidity Coverage Ratio

	Three Months Ended March 31, 2026	
	Average Weighted ⁽¹⁾	
<i>(Dollars in millions)</i>		
HQLA Amount ⁽²⁾	\$	65,657
Total adjusted NCO amount ⁽³⁾	\$	39,573
LCR		166 %

⁽¹⁾ Represents the average weighted amount after applying regulatory prescribed HQLA haircuts or cash outflow and inflow rates.

⁽²⁾ Excludes Trapped Liquidity at the Bank.

⁽³⁾ Total net cash outflow reduced to 85%.

The Company's average LCR was driven by:

- HQLA Amount, which primarily consists of cash on deposit at central banks and eligible Level 1 and Level 2A securities; and
- Total adjusted net cash outflow ("NCO") amount, predominantly related to deposits.

The Company's average LCR decreased from 173% in the fourth quarter of 2025 to 166% in the first quarter of 2026, driven by an increase in NCO. Our LCR may fluctuate period over period as a result of ongoing business activity. We provide additional information on HQLA and NCO in the following sections of this report, respectively.

High-Quality Liquid Assets

HQLA are assets that can be easily and quickly converted into cash. Under the LCR Rule, assets may qualify as eligible HQLA if they are unencumbered, are able to be monetized, and are free of any other transfer restrictions. Eligible HQLA are categorized based on their risk profile, market-based characteristics, and central bank eligibility, and are divided into three categories: Level 1, Level 2A and Level 2B. Level 1 assets include central bank reserves (less any applicable reserve requirements) and certain marketable securities issued or backed by sovereigns and central banks. Level 2A assets, which are subject to a 15% haircut, generally include certain securities backed by U.S. government-sponsored enterprises and securities issued by sovereigns or central banks which are not eligible for the Level 1 category. Level 2B assets, subject to a 50% haircut, generally include certain corporate debt securities and publicly traded common equities.

The LCR Rule prescribes a liquid asset cap such that an institution cannot have more than 40% of its HQLA in Level 2 assets and no more than 15% of its HQLA in Level 2B assets. To the extent an institution has excess Level 2A or Level 2B assets, that excess is not included in the HQLA Amount used for purposes of computing the LCR. In addition, per the LCR Rule, the Company's HQLA Amount also excludes any Trapped Liquidity, which is the HQLA held at the Bank in excess of the Bank's total net cash outflows that are not transferable to non-bank affiliates.

The following table provides the average values of our HQLA and related components for the quarterly period ended March 31, 2026.

Table 2: Eligible HQLA Composition

<i>(Dollars in millions)</i>	Three Months Ended March 31, 2026	
	Average Unweighted⁽¹⁾	Average Weighted⁽²⁾
Eligible HQLA⁽³⁾	\$ 67,621	\$ 65,657
Eligible Level 1 liquid assets	54,528	54,528
Eligible Level 2A liquid assets	13,093	11,129
Eligible Level 2B liquid assets	—	—

⁽¹⁾ Represents the average unweighted amount of eligible HQLA before applying regulatory prescribed haircuts.

⁽²⁾ Represents the average weighted amount after applying regulatory prescribed HQLA haircuts.

⁽³⁾ Excludes Trapped Liquidity at the Bank. Eligible HQLA may not equal “HQLA Amount” reported in Tables 1 and 5 due to the application of the Level 2 liquid asset caps. Eligible Level 2 assets in this table may exceed the 40% cap.

Net Cash Outflows

The total NCO amount is determined by calculating the prescribed outflows and inflows over a 30 calendar-day stress horizon. The NCO amount is calculated by applying outflow and inflow rates to certain assets, liabilities and off-balance sheet arrangements based on their contractual maturity as prescribed in the LCR Rule. Where contractual maturity is not applicable, the LCR Rule generally sets forth conservative stressed outflow assumptions.

The LCR Rule caps the amount of cash inflows that an institution can assume in a stress event at 75% of cumulative cash outflows. The LCR Rule also requires covered institutions to adjust the NCO amount by the difference between the peak day mismatch between cumulative outflows and inflows over the 30 calendar-day time horizon and the total inflows and outflows on the final day of that horizon (“Maturity Mismatch Add-On”). This add-on is intended to address potential maturity mismatches between early outflows and late inflows.

The following table provides a summary of our average NCO amounts for the quarterly period ended March 31, 2026. As a Category III institution, the total NCO amount is adjusted after including the Maturity Mismatch Add-On (“Total Unadjusted NCO Amount”) by an outflow adjustment percentage of 85%, resulting in the Total Adjusted NCO amount that is used to compute our LCR.

Table 3: Net Cash Outflows

<i>(Dollars in millions)</i>	Three Months Ended March 31, 2026	
	Average Weighted⁽¹⁾	
Total NCO amount excluding the Maturity Mismatch Add-On	\$	42,599
Maturity Mismatch Add-On		3,957
Total Unadjusted NCO amount		46,556
Outflow Adjustment Percentage		85 %
Total Adjusted NCO amount	\$	39,573

⁽¹⁾ Represents the average weighted amount after applying regulatory prescribed cash outflow and inflow rates.

Funding Sources

The Company's primary funding source comes from insured deposits from our Consumer Banking business, as they are a relatively stable and lower cost source of funding. The Company also sources deposits from other customers and counterparties, which primarily consist of commercial deposits. Under the LCR Rule, these other deposits are generally classified as either operational or non-operational. Finally, the Company sources deposits through the mediation or assistance of deposit brokers. These deposits are segmented and assigned outflows according to the type of account, whether deposit insurance is in place and the maturity date of the deposit agreement.

A significant portion of our deposits from our Consumer Banking business are fully FDIC-insured and are considered to be stable under the LCR Rule. Under the LCR Rule, the Company is required to categorize the full amount of any deposit that is above the FDIC limit as uninsured, even though the portion of that deposit that is within the FDIC limit would be insured. Under the LCR treatment, uninsured deposits will be higher than the level presented in our SEC filings. Our Q1 2026 Form 10-Q provides an estimate of the uninsured deposit amounts, which excludes the portion of a deposit that is within the FDIC limit and is based on methodologies and assumptions used for our "Consolidated Reports of Condition and Income" (FFIEC 031) filed with the Federal Banking Agencies, primarily adjusted to exclude intercompany balances and cash collateral received on certain derivative contracts which are not presented within deposits on our consolidated balance sheet. Our uninsured deposit amount disclosed in our Q1 2026 Form 10-Q was \$73.6 billion, which is lower than the uninsured deposit amount for LCR purposes as of March 31, 2026 due to the treatment described above.

In addition to deposits, we raise funding through the issuance of senior and subordinated notes, securitized debt obligations, federal funds purchased, securities loaned or sold under agreements to repurchase and FHLB advances secured by certain portions of our loan and securities portfolios. A key objective in our use of these markets is to maintain access to a diversified mix of wholesale funding sources.

For additional information on our funding sources and uninsured deposit base, see "Part I—Item 2. MD&A—Consolidated Balance Sheets Analysis—Funding Sources" and "Part I—Item 2. MD&A—Liquidity Risk Profile—Funding Sources" in our Q1 2026 Form 10-Q as well as "Part II—Item 7. MD&A—Consolidated Balance Sheets Analysis—Funding Sources" and "Part II—Item 7. MD&A—Liquidity Risk Profile—Funding" in our 2025 Form 10-K.

The following table provides a summary of our average deposit and wholesale funding outflows under the LCR Rule for the quarterly period ended March 31, 2026.

Table 4: Deposit and Wholesale Funding Outflows

	Three Months Ended March 31, 2026	
	Average Unweighted ⁽¹⁾	Average Weighted ⁽²⁾
<i>(Dollars in millions)</i>		
Deposit outflow from retail customers and counterparties, of which:	\$ 440,284	\$ 23,325
Stable retail deposit outflow	307,884	9,237
Other retail funding outflow	113,364	11,357
Brokered deposit outflow	19,036	2,731
Unsecured wholesale funding outflow, of which:	32,789	12,763
Operational deposit outflow	12,576	3,070
Non-operational funding outflow	19,613	9,132
Unsecured debt outflow	600	561
Total	\$ 473,073	\$ 36,088

⁽¹⁾ Represents the average unweighted amount before applying regulatory prescribed cash outflow rates.

⁽²⁾ Represents the average weighted amount after applying regulatory prescribed cash outflow rates.

Derivative Usage

We use derivatives to manage market risk exposures according to market risk management policies and limits approved by our Board of Directors. The Company primarily manages its market risk exposures through interest rate, commodity and foreign currency derivatives. The derivative instruments deployed typically include swaps, options, futures and forward contracts.

We offer interest rate, commodity, foreign currency derivatives and other contracts as an accommodation to our customers within our Commercial Banking business. We enter into these derivatives with our customers primarily to help them manage their interest rate risks, hedge their energy and other commodities exposures, and manage foreign currency fluctuations. We offset the substantial majority of the market risk exposure of our customer accommodation derivatives through derivative transactions with other counterparties.

For purposes of the LCR Rule, an institution's net derivative cash outflow or inflow amount equals the sum of contractual payments, collateral and initial margin that will be made or delivered to or received from each counterparty over the prospective 30 calendar-day time horizon.

For additional information on derivative transactions, see "Part I—Item 1. Financial Statements—Note 9—Derivative Instruments and Hedging Activities" in our Q1 2026 Form 10-Q.

LCR Quantitative Disclosures

The following table provides the average values for our LCR and related components calculated pursuant to the LCR Rule for the quarterly period beginning January 1, 2026 and ending March 31, 2026.

Table 5: LCR Quantitative Disclosures

	Three Months Ended March 31, 2026	
	Average Unweighted ⁽¹⁾	Average Weighted ⁽²⁾
<i>(Dollars in millions, except as noted)</i>		
HQLA:		
Total eligible HQLA, of which:⁽³⁾	\$ 67,621	\$ 65,657
Eligible Level 1 liquid assets	54,528	54,528
Eligible Level 2A liquid assets	13,093	11,129
Eligible Level 2B liquid assets	—	—
Cash outflow amounts:		
Deposit outflow from retail customers and counterparties, of which:	440,284	23,325
Stable retail deposit outflow	307,884	9,237
Other retail funding outflow	113,364	11,357
Brokered deposit outflow	19,036	2,731
Unsecured wholesale funding outflow, of which:	32,789	12,763
Operational deposit outflow	12,576	3,070
Non-operational funding outflow	19,613	9,132
Unsecured debt outflow	600	561
Secured wholesale funding and asset exchange outflow	5,977	819
Additional outflow requirements, of which:	51,447	15,275
Outflow related to derivative exposures and other collateral requirements	6,831	6,556
Outflow related to credit and liquidity facilities including unconsolidated structured transactions and mortgage commitments	44,616	8,719
Other contractual funding obligation outflow	1,243	1,243
Other contingent funding obligations outflow	—	—
Total cash outflow	\$ 531,740	\$ 53,425
Cash inflow amounts:		
Secured lending and asset exchange cash inflow	\$ 22	\$ 22
Retail cash inflow	8,087	4,044
Unsecured wholesale cash inflow	2,889	2,336
Other cash inflows, of which:	4,424	4,424
Net derivative cash inflow	4,254	4,254
Securities cash inflow	170	170
Broker-dealer segregated account inflow	—	—
Other cash inflow	—	—
Total cash inflow	\$ 15,422	\$ 10,826
		Average Total⁽⁴⁾
HQLA Amount⁽⁵⁾		\$ 65,657
Total NCO Amount, Excluding The Maturity Mismatch Add-On		42,599
Maturity Mismatch Add-On		3,957
Total Unadjusted NCO Amount		46,556
Outflow Adjustment Percentage		85 %
Total Adjusted NCO Amount		\$ 39,573
Liquidity Coverage Ratio (%)		166 %

⁽¹⁾ Represents the average unweighted amount of eligible HQLA and NCO before applying regulatory prescribed haircuts or cash outflow and inflow rates.

⁽²⁾ Represents the average weighted amount after applying regulatory prescribed HQLA haircuts or cash outflow and inflow rates.

⁽³⁾ Excludes Trapped Liquidity at the Bank. Eligible HQLA may not equal HQLA Amount reported in this table due to the application of the Level 2 liquid asset caps. Eligible Level 2 assets may exceed the 40% cap.

⁽⁴⁾ The amounts reported in this column may not be equal to the calculation of those amounts using component amounts as reported in the preceding portion of the table due to factors such as the application of the Level 2 liquid asset caps and the total inflow cap.

⁽⁵⁾ Excludes Trapped Liquidity at the Bank.
